Most school districts offer the challenge / advancement / placement tests (mostly in Common Core) allowing students to advance. For the current 5th and 6th graders, this is the only chance to progress into the “CCSS 6th / 7th / 8th Algebra + Geometry” advanced track (regularly 9th grade). Let us help you advance.

Advancement Prep is designed for students who have finished the course and wish to advance by passing the Placement tests. To maximize the effectiveness, the guided program is designed so students may exercise on different concepts at their own pace. This flexibility allows students to focus on improving the areas of their own weakness.

Whether you want to accelerate by taking the Middle School Placement Test, pass the school-entrance test, advance the curriculum, aim for better grades, or get a deeper understanding of the concepts, these guided courses will give you a solid foundation needed to succeed in school.
